

CHRIST & CLIMATE

What has Christ got to do with COP 26?

Wednesdays: 7:30-8:30pm online: 10, 17, 24 November, 1 December

The purpose of this 4 part presentation is to explore how our understanding of Christ engages with the 'superwicked problem' of climate change and the arrival of the Anthropocene. It will weave together current insights from the life of faith (via the Bible, theology), the Earth System scientists, Australian writers and IPCC reports. There will be links to resources for those who may wish to delve more deeply

Each evening will consider a different setting and theme:

- ▶ Signs of the times
- ▶ "Am I not your neighbour?" - Islands
- ▶ "A citizen of no mean city" - Urban settings
- ▶ Fire and drought - In the bush

This series will be led by members of the Centre.
